

The Complete Guide to Corrosion Prevention

Av-DEC's Online Virtual Product Training incorporates everything you need to know about corrosion prevention and Av-DEC product installation.

Av-DEC has been at the forefront of innovation in corrosion prevention for over two decades. Take it from the experts - proper installation is an essential part of product performance.

User Testimonials:

Thixoflex® Black, TG3212, Installation Training:

"I found the training easy to access and the video is short and to the point. Quality is good and explains the procedure very clearly. We intend to use this particular video as part of our 2 year refresher training for all of our engineers."

Self-Leveling® Clear, SF2470, Installation Training:

"The link and training lessons are very easy to use and very helpful."

New Additions to the Training Platform

New additions are routinely added to the training page. The latest additions include:

[Injectible Sealant Wet Install Fasteners](#)

[Priming Sealant- 50cc & 200cc Cartridges](#)

Av-DEC Online Training Courses have become an integral part of many maintenance routines. The thorough training courses walk you through step-by-step instructions on proper implementation and product installation. The virtual training platform directly mirrors the experience of in-person training.

Av-DEC's Online Training Courses are offered complimentary.

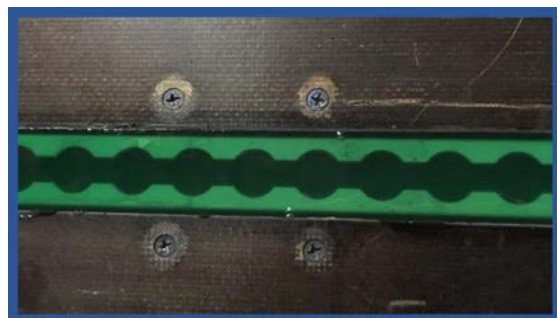

Products Offered in Training:

Antenna Gasket Installation

Polyurethane Rolled Sealant Installation

Injectible Sealant Priming & Installation
