

21st Century Solutions

When Lockheed Martin was experiencing damage on their Hercules C-130J deicing boot and saddle, they teamed up with Av-DEC to find a solution.

After much evaluation, Lockheed Martin decided on a hybrid combination of Av-DEC's [TufSeal® polyurethane rolled sealant \(PRS®\)](#), [HI-TAK® specialty conductive gasket](#), and [Thixoflex Black® injectable sealant](#) to solve their saddle fairing issue.

C-130J Hercules
