Av-DEC and GLOBALJET Services Announce Partnership to Provide Aircraft Theory, Identification, Treatment and Prevention Training Courses

Aviation Devices & Electronic Components, LLC (Av-DEC) and GLOBALJET Services, INC. announce collaboration to offer on-location and virtual training courses that feature comprehensive aircraft corrosion awareness and prevention methods.

Fort Worth, TX, USA: March 17, 2021- GLOBALJET Services, Inc. and Aviation Devices and Electronic Components, LLC (Av-DEC) are industry-leaders in both aviation training and aircraft corrosion-prevention solutions. Both companies have adapted to the current working environment by creating virtual training courses that directly mirror the experience of having hands-on training. Av-DEC and GLOBALJET Services have combined their complementary skillsets to create a virtual training course that highlights valuable insights, corrosion-prevention knowledge and specific solutions to provide a fundamental learning experience and unmatched value to the end-user.

Recognizing the importance and benefits of having thorough, detailed, corrosion-prevention training, Av-DEC and GLOBALJET Services collaborated to create an all-inclusive aircraft corrosion information and prevention training course. Both Av-DEC and GLOBALJET have mastered the in-person and virtual training environment and have successfully served airlines, MRO facilities and aviation professionals from around the world with virtual support and guidance.

GLOBALJET Services Live Interactive Virtual Education (L. I. V. E.) offers extensive, fundamental training that has earned a strong reputation for excellence within the aviation training industry. Av-DEC's Virtual Training launched in August of 2020, offering multiple product application training videos, and has since become an integral part of many maintenance routines. With the complementary skillsets from GLOBALJET and Av-DEC blended, and unique perspectives incorporated, the joint training offers an unrivalled learning opportunity. This training can be conducted online or on-location.
