Thixoflex® White: The Next Generation in Durable, Watertight Sealants

Fort Worth, TX — November 19, 2024 — Av-DEC® is proud to announce the launch of Thixoflex® White, a revolutionary two-component polyurethane sealant engineered for maximum durability and environmental protection in aviation and other rigorous applications.

Thixoflex® White is designed to deliver superior performance as a watertight sealant, offering exceptional UV resistance and a high degree of cohesion. Its thixotropic properties make it particularly advantageous for use in vertical and overhead applications, allowing for precise application without the risk of sagging or dripping.

This fast-curing sealant is perfect for a variety of sealing needs, including perimeter, gap, and faying surface sealing. It is especially well-suited for sealing antennas, lights, and panels, making it a versatile tool for aerospace applications.

A key highlight of Thixoflex® White is its exceptional UV resistance and outstanding resistance to Jet-A and other aviation fluids, ensuring reliable performance in challenging environments. Plus, it can be easily removed when necessary, streamlining maintenance and repairs.

"With Thixoflex® White, we are raising the bar for sealants in the aviation industry. Our dedication to innovation and quality ensures that our customers have access to products that not only meet but exceed their expectations for corrosion prevention."

- Jon Jacobson, Commercial Sales Manager of Av-DEC®

Thixoflex® White is now available. For more information, please visit our website at www.avdec.com or contact our sales team.

About Av-DEC®

Av-DEC® is a leading provider of advanced sealant solutions, committed to delivering innovative products that adhere to the highest industry standards. With a focus on quality, performance, and customer satisfaction, Av-DEC® continually drives innovation within the sealant market.
